

*The beauty of pure North American hardwood, harvested and thermally-modified to perfection in the United States.*

#### PROJECT PROFILE

### **MATCHING AESTHETICS**

Homeowner in Pennsylvania who sought a domestically-sourced all-natural wood solution for their new multi-level deck. A key requirement was that it had to fit aesthetically with the home's existing wood siding, which was allowed to weather naturally over time. With this goal in mind, Americana™ requires no maintenance...the wood will "silver" naturally and need only be cleaned periodically.

One year after installation, the decking and railings made from Americana™ Thermally Modified Ash have taken on the character of the home, to the delight of the owner. Given the inherent strength of the Thermally Modified Ash product, the end joints are uniquely cut so that they radiate from the house at an angle, producing a striking visual feature, and showcasing both the beauty and versatility of Americana™.
